BHAVESH BAROT

Mobile Architect | Technical Lead | React Native / Flutter / iOS Specialist

Location: Ahmedabad, India | Phone: +91 9724667687 | Email: bhaveshbarot01@gmail.com

LinkedIn: linkedin.com/in/bhavesh-barot-b0a164184 | GitHub: github.com/bhavesh2706 | Portfolio: bhavesh2706.github.io/portfolio

PROFESSIONAL SUMMARY

Mobile Architect and Technical Lead with **11+ years** of experience designing, building, and scaling high-performance **React Native**, **iOS**, **Flutter**, and **tvOS** applications across **Healthcare**, **FinTech**, media, consumer, and enterprise domains. Shipped **40+ production applications** built on **Clean Architecture**, **MVVM**, offline-first systems, real-time synchronization, Continuous Integration and Continuous Delivery (**CI/CD**), and AI-assisted engineering. Led cross-functional teams of **6–8 engineers**, conducted **50+ architecture reviews**, and sustained a **98% on-time delivery** track record. Open to **full-time remote**, **relocation**, and selective **contract** engagements.

* **Note on Code Portfolio:** Most professional work is under Non-Disclosure Agreement (**NDA**), so production source code cannot be published. Public packages and personal work on **GitHub** reflect production engineering standards. Happy to walk through architecture and code in a technical discussion or interview.

TECHNICAL SKILLS

Cross-Platform:	**React Native**, **Flutter**, Dart, **TypeScript**
Native iOS:	**Swift**, Objective-C, **UIKit**, **AVFoundation**, **tvOS**, Apple TV
State & Architecture:	Redux Toolkit, **MVVM**, **Clean Architecture**, Modular Architecture
Backend & Data:	**Firebase**, REST APIs, WebSockets, GraphQL, **Offline-First Design**, Real-Time Sync
DevOps & CI/CD:	**Fastlane**, **GitHub Actions**, TestFlight, App Store Connect, Google Play Console
Telecom:	**SIP**, **VoIP**, Real-Time Mobile Communication
Leadership:	Code Review, **Team Leadership**, Mentoring, **Architecture Review**, Agile, Sprint Planning
AI-Assisted Tools:	ChatGPT, Cursor AI, GitHub Copilot, Claude Code AI — **35% delivery acceleration**

ADDITIONAL INFORMATION

Total Experience:	**11+ years**
Apps Shipped:	**40+ production applications**
Domains:	**Healthcare**, **FinTech**, Media, OTT, Consumer, Enterprise, Security
Availability:	**Remote worldwide** | **Relocation** | **Selective contract**
Languages:	English (Professional Working), Hindi (Native), Gujarati (Native)

PROFESSIONAL EXPERIENCE

Team Lead & Mobile Architect | Saeculum Solutions Pvt Ltd

Feb 2022 – Present | Ahmedabad, India

- Directed architecture and delivery of **10+ production apps** using **React Native**, **iOS**, and **Flutter** for enterprise clients
- Architected a Distributed Ledger Technology (**DLT**) decentralized identity platform with biometric auth (**Face ID / Touch ID**), cryptographic key management, and secure portable storage
- Designed modular, offline-first data layers improving sync reliability for **100,000+ records**
- Introduced AI-assisted engineering practices reducing feature delivery time by **35%** while maintaining **95%+** code quality
- Implemented **Fastlane** and **GitHub Actions** CI/CD pipelines automating **iOS** and **Android** releases
- Led and mentored a team of **6–8 engineers**; conducted **50+ architecture and code reviews**; improved sprint predictability by **40%**
- Reduced application crash rates by **25%** through Instruments profiling, memory optimization, and background-process improvements
- Architected enterprise ticketing and communication platforms handling bulk messaging, real-time analytics, and collaboration for **50,000+ users**

Senior iOS Developer & Flutter Developer & Team Lead | ADSquare Technology Pvt Ltd

Oct 2020 – Feb 2022 | Ahmedabad, India

- Built and supported **3 production iOS** and **Flutter** applications with Apple Push Notification service (**APNs**) and Firebase Cloud Messaging (**FCM**) serving **20,000+ users**
- Improved user engagement by **25%** through onboarding enhancements and push notification optimization
- Performed **50+ peer code reviews**, reducing recurring defects by **30%**
- Upheld **90% client satisfaction** through weekly updates, rapid feedback loops, and on-time milestone delivery

Senior iOS Developer (Team Lead) | Pacific Global Solutions

Nov 2018 – Oct 2020 | Ahmedabad, India

- Engineered **2 flagship iOS apps** using **Swift** and **UIKit** for enterprise deployments with **15,000+ active users**
- Reduced app load time by **20%** through memory profiling, API caching, and background task optimization
- Increased post-launch user retention by **15%**; reduced crash rates by **40%**
- Coordinated a **3-member iOS team** with **100% on-time delivery** across **8 major release cycles**

Senior iOS Developer | Ecosmob Technologies Pvt Ltd

Jan 2018 – Oct 2018 | Ahmedabad, India

- Completed **6+ iOS release cycles** at **98% delivery accuracy** through milestone-driven agile execution

- Prepared technical specifications for **3 client projects**, reducing scope changes by **25%**
- Contributed to a **tvOS / Apple TV** application, optimizing large-screen navigation and reducing frame drops by **35%**
- Enabled **SIP** and **VoIP** communication features for **5,000+ users**

Senior iOS Developer | Harmis Technology

Jul 2015 – Jan 2018 | Ahmedabad, India

- Developed **8+ native iOS applications** using **Objective-C** and **Swift** with custom UI components and animations
- Integrated RESTful APIs and optimized networking layers, reducing API response latency by **30%**
- Resolved crash-analytics issues, achieving **99.5% crash-free sessions**, and maintained technical documentation

KEY PROJECTS

OTT & Streaming Platform | Tech Stack: **Swift**, **AVFoundation**, DRM, AirPlay, Chromecast

Architected high-performance streaming application with DRM protection and multi-device casting supporting **25,000+ concurrent users**.

Healthcare Management Platform | Tech Stack: **React Native**, Firebase, Real-Time Sync, iPad

Built healthcare platform with real-time data synchronization for **500+ iPad deployments** across **12 medical facilities**.

Offline-First Inspection System | Tech Stack: **React Native**, Conflict Resolution, Analytics

Developed field inspection system with offline capability and automated conflict resolution processing **10,000+ inspections monthly**.

Enterprise Messaging & Collaboration | Tech Stack: Bulk Messaging, Analytics, Collaboration

Launched enterprise-grade communication platform (**NDA protected**) handling **1M+ messages daily** with real-time analytics.

OPEN SOURCE CONTRIBUTIONS

- **@bhavesh2706/react-native-smart-image** — High-performance React Native image component — GitHub
- **react-native-smart-dropdown** — Customizable React Native dropdown package — GitHub
- **react-native-smart-otp** — OTP / authentication UI with autofill support — GitHub

EDUCATION

Master of Computer Applications (MCA) | Master's equivalent

Government Engineering College, Ajmer, India | 2012 – 2015
